**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim language states "the gauging means including a plumb bob" then states "the gauging means including means for assessing the true status of a frame in relation to three dimensional space." It is considered that a plumb bob would be the means for assessing the true status of a frame in relation to three dimensional space, as indicated by the disclosure, however the language of the claim appears to indicate that the gauging means includes secondary means for assessing the true status of a frame in relation to three dimensional space, in addition to the plumb bob. This secondary means has not been disclosed and is considered a redundancy, rendering the claim indefinite.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. (U.S. Patent 5426860).

Lee et al. disclose a tool (10) for inspecting and gauging the accuracy of an installed steel door frame structure, the tool having a means for removable attachment to a frame (14), the tool also having spaced means (18) (Figure 3) for gauging the condition of the frame in relation to a true status, the gauging means including a plumb bob (12), the tool having means for storing the plumb bob inside the tool (Figure 2), the gauging means including means (16) for assessing the true status of a frame in relation to three dimensional space (Figure 3).

Lee et al. does not disclose expressly the attachment means include a magnet.

Owens, Jr. discloses a magnetic plumb bob holder with magnetic means (12) for use in steel frames (42) (Figure 3). Therefore, it would have been obvious to one with ordinary skill in the art at the time of the invention was made to add the magnetic material disclosed by Owens, Jr. to the base (62) disclosed by Lee et al. in order that would be closer to the door frame giving a truer reading of the status of said frame.

#### ***Allowable Subject Matter***

5. The following is a statement of reasons for the indication of allowable subject matter:

With reference to claims 6-16, the prior art of record does not disclose or clearly suggest a tool for inspecting the accuracy of installed frames comprising a first and second flange extending from the base spaced apart from each other in combination with the remaining limitations in the claims.

#### ***Response to Arguments***

6. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
